DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-8 are rejected under 35 U.S.C. 102(e) as being anticipated by or under 35 USC 103 as obvious over Matyjaszewski et al, U. S. Patent 5,807,937.

Reference to Matyjaszewski et al specifically teaches the claimed process with the monomers claimed and teaches the incorporation of OH groups at the ends of the polymer chains (see column 27) as well as the reaction of these groups (see column 39). The specific method of incorporating the functionalities at the end group is not the same but the resulting structure at least in the case of "chain-extended" polymers would reasonably be presumed to be the same with the same functionalities in view of the use of the same monomers and the functionalities being described as the same. Applicant's argument that the reference does not teach or achieve the stellar polymers is not persuasive since the claims are not restricted to star polymers. Applicant's statement that the chain-extended polymers are not taught is not deemed accurate insofar as the same monomers are used and the end functionalities are described. The claimed polymers and compositions are, therefore, either anticipated or rendered prima facie obvious by the reference to Matyjaszewski et al.

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
